RT13V60 "RELEASE NUMBER" NUM(1.0)

Release Number

For Release 2 we have generated a new distance measure RT13V112 which is a calculation in whole miles between the Main Family place code coordinates and the Parent/Child place code coordinates. Please note this new variable may be obtained under restricted contract only.

For Release 3 we have generated a new categorical distance measure RT13V133 on the Parent/Child File using RT13V112 variable Miles. We have also updated all Person Numbers so that the Parent/Child File correctly merges with the latest 1968-2015 Cross Wave Individual File.

For Release 4 we have corrected a handful of Parent/Child Person Numbers on the Parent/Child file that were not correctly updated to latest version on the 2015 Parent Identification File.

For Release 5 we have updated all Person Numbers so that the Parent/Child File correctly merges with the latest 1968-2017 Cross Wave Individual File.

For Release 6 we have a handful Parent/Child records that had a mismatch between the number of parent records on the Parent/Child File and the summary variable RT13V10 on the family file. We also make a handful of Person Number changes based on changes to Parent Identification File.

For Release 7 we have updated all Person Numbers so that the Parent/Child File correctly merges with the latest 1968-2019 Cross Wave Individual File.

For Release 8 we have updated all Person Numbers so that the Parent/Child File correctly merges with the latest 1968-2021 Cross Wave Individual File.

RT13V61=RT13V2 (RT Family file variable). Please note this number is unique on the RT13FAM file but may not be contiguous.

This variable is a component of the primary key for the Parent/Child File.

RT13V61 (Interview Number) + RT13V70 (Type of Record) + RT13V72 (Record Number) provides a unique key to every record on this Parent/Child File.
