RT13V60 "RELEASE NUMBER" NUM(1.0)

Release Number

For Release 2 we have generated a new distance measure RT13V112 which is a calculation in whole miles between the Main Family place code coordinates and the Parent/Child place code coordinates. Please note this new variable may be obtained under restricted contract only.

For Release 3 we have generated a new categorical distance measure RT13V133 on the Parent/Child File using RT13V112 variable Miles. We have also updated all Person Numbers so that the Parent/Child File correctly merges with the latest 1968-2015 Cross Wave Individual File.

For Release 4 we have corrected a handful of Parent/Child Person Numbers on the Parent/Child file that were not correctly updated to latest version on the 2015 Parent Identification File.

For Release 5 we have updated all Person Numbers so that the Parent/Child File correctly merges with the latest 1968-2017 Cross Wave Individual File.

For Release 6 we have a handful Parent/Child records that had a mismatch between the number of parent records on the Parent/Child File and the summary variable RT13V10 on the family file. We also make a handful of Person Number changes based on changes to Parent Identification File.

For Release 7 we have updated all Person Numbers so that the Parent/Child File correctly merges with the latest 1968-2019 Cross Wave Individual File.

For Release 8 we have updated all Person Numbers so that the Parent/Child File correctly merges with the latest 1968-2021 Cross Wave Individual File.

For Release 9 we have updated all Person Numbers so that the Parent/Child File correctly merges with the latest 1968-2023 Cross Wave Individual File.

RT13V61 "ROSTERS AND TRANSFERS FILE (ID) NUMBER" NUM(5.0)

Rosters and Transfers Interview Number

This number is the merge key between the Rosters and Transfers Family Level File (RT13FAM) and it's companion file Rosters and Transfers Parent/Child Level File (RT13PARCHD). There may be some records in the family level file that have no corresponding records on the Parent/Child file however, all records in the Parent/Child file will have a record on the RT Family level file. RT13V61=RT13V2 (RT Family file variable). Please note this number is unique on the RT13FAM file but may not be contiguous.

This variable is a component of the primary key for the Parent/Child File.

RT13V61 (Interview Number) + RT13V70 (Type of Record) + RT13V72 (Record Number) provides a unique key to every record on this Parent/Child File.

About how much did you (your spouse/partner/wife/"wife") give?--AMOUNT

To obtain total dollars given in 2012, multiply the number of dollars in RT13V125 by the numbers of weeks; months, etc. in a year coded in RTR13V126. Responses recorded as 'other' in RT13V126 were recoded to be total annual dollars in RT13V125 whenever possible based on interviewer notes.

The questionnaire indicates a hard range for PT7 with a lower bound of \$100 irrespective of the unit of time. If a respondent reported an amount less than \$100 for any unit of time other than a year (e.g. \$50 a month), interviewers were able to record this information in notes fields and PSID staff edited the information to record an amount for the year. It is possible that in some instances the interviewers did the calculation for the annual amount during the interview and recorded the annualized amount. It is likely that interviewers then recorded the unit of time as 'Year.'

To obtain total dollars given in 2012, multiply the number of dollars in RT13V128 by the numbers of weeks; months, etc. in a year coded in RTR13V129. Responses recorded as 'other' in RT13V129 were recoded to be total annual dollars in RT13V128 whenever possible based on interviewer notes.

The questionnaire indicates a hard range for PT9 with a lower bound of \$100 irrespective of the unit of time. If a respondent reported an amount less than \$100 for any unit of time other than a year (e.g. \$50 a month), interviewers were able to record this information in notes fields and PSID staff edited the information to record an amount for the year. It is possible that in some instances the interviewers did the calculation for the annual amount during the interview and recorded the annualized amount. It is likely that interviewers then recorded the unit of time as 'Year.'
