V3439   "WEEKLY FD NEED"   NUM(6.2)
Weekly Food Needs
This variable's values are based on USDA Low-Cost Plan estimates of weekly food costs,
according to the table below (reproduced from Family Economics Review, June 1967), summed
for the family as it was at the time of the interview.

INDIVIDUAL FOOD STANDARD (LOW COST)

$3.90 for both males and females under age 4
$4.60 for both males and females age 4-6
$5.50 for both males and females age 7-9
$6.40 for males age 10-12
$6.30 for females age 10-12
$7.40 for males age 13-15
$6.90 for females age 13-15
$8.70 for males age 16-20
$7.20 for females age 16-20
$7.50 for males age 21-35
$6.50 for females age 21-35
$6.90 for males age 36-55
$6.30 for females age 36-55
$6.30 for males age 56 and older
$5.40 for females age 56 and older

This same standard has been used in previous waves. Since the table is from 1967, values
are in 1967 dollars. Adjustments for inflation, etc., are left to users.

The actual weekly food needs in dollars and cents are coded here.

Count	%	Value/Range	Code Value/Range Text
5,517	100.00	5.20 - 110.60	Actual weekly food needs

V3440   **"ANN NEED STND"**   NUM(5.0)
Annual Need Standard in 1973

*This is the Orshansky-type poverty threshold based on an annual food needs standard which
is derived from the weekly food costs in the preceding variable, converted to an annual
amount, and adjusted for economies of scale by USDA rules as follows:*

    Single person . . . . .add 20%

    Two persons . . . . .add 10%

    Three persons . . . . add 5%

    Four persons . . . . .no change

    Five persons . . . . .deduct 5%

    Six or more persons . . . . deduct 10%

*An additional adjustment for diseconomies of small households (in
rent, etc.) was made as follows:*

    4.89 times the food needs for single persons

    3.70 times the food needs for two-person units

    3.00 times the food needs for all other units

*Please refer to the Wave VII (1974) Documentation volume, pp. 39-41, and to the User Guide
for further details on the need standard. It makes use of the table in the previous
variable, which is in 1967 dollars. Note that this variable is not adjusted for inflation,
nor is it exactly comparable to the official poverty standard; such changes are left to
users. This need standard is adjusted for changes in family composition during 1974 and is
not adjusted for farmers; see V3692 for an income/needs measure which makes this
adjustment.*

V3530_A   "OCCUPATION OF HEAD   74"   NUM(3.0)
D2. What is your main occupation? (What sort of work do you do?)
D3. Tell me a little more about what you do.
E6. What sort of work did you do on your last job? (What was your occupation?)
F3. What kind of work did you do when you worked? (What was your occupation?)
Please note that at the time occupations were originally coded in 1974, a three-digit
occupation was coded for Head and Wife/"Wife" in addition
to the one-digit occupation. These original three-digit occupation codes (V3529 and
V3600) may not be identical to the newly added, independently coded, retroactive
occupation code.

This version of occupation was coded retroactively using original PSID reports and the
three-digit 1970 Census occupation codes for a selected sample of PSID Heads and
Wives/"Wives":

(a) Original sample Heads and Wives/"Wives still living by
*   1992 who reported main jobs in at least three waves*
*   during the period 1968-1992, with at least one of those*
*   reports prior to 1980.*

(b) Additionally, original sample Heads and Wives/"Wives" who
*   had reported at least one main job between 1968 and 1980*
*   but were known to have died by 1992.*

The selection criteria did not include all Heads and Wives/"Wives"
who had worked between 1968 and 1980. Those who were still living
but had reported only one or two jobs during the period of interest
were excluded, as were all nonsample Heads and Wives/"Wives".
Therefore not every Head or Wife/"Wife" has data for this variable.
For detailed information about the Retrospective Coding Project, please
see the document, 'A Panel Study of Income Dynamics: 1968-1980
Retrospective Occupation-Industry Files Documentation', on our website.

The 3-digit industry code from 1970 Census of Population; Alphabetical Index of Industries
and Occupations issued June 1971 by the U.S. Department of Commerce and the Bureau of the
Census was used for this variable. Please refer to Appendix V2, Wave XIV documentation,
for complete listings.

V3601_A   "OCCUPATION OF WIFE   74"   NUM(3.0)
G3. What kind of work did she do?

Please note that at the time occupations were originally coded in 1974, a three-digit occupation was coded for Head and Wife/"Wife" in addition to the one-digit occupation. These original three-digit occupation codes (V3529 and V3600) may not be identical to the newly added, independently coded, retroactive occupation code.

This version of occupation was coded retroactively using original PSID reports and the three-digit 1970 Census occupation codes for a selected sample of PSID Heads and Wives/"Wives":

*(a) Original sample Heads and Wives/"Wives still living by
     1992 who reported main jobs in at least three waves
     during the period 1968-1992, with at least one of those
     reports prior to 1980.*

*(b) Additionally, original sample Heads and Wives/"Wives" who
     had reported at least one main job between 1968 and 1980
     but were known to have died by 1992.*

*The selection criteria did not include all Heads and Wives/"Wives"
who had worked between 1968 and 1980. Those who were still living
but had reported only one or two jobs during the period of interest
were excluded, as were all nonsample Heads and Wives/"Wives".
Therefore not every Head or Wife/"Wife" has data for this variable.
For detailed information about the Retrospective Coding Project, please
see the document, 'A Panel Study of Income Dynamics: 1968-1980

*The 3-digit industry code from 1970 Census of Population; Alphabetical Index of Industries
and Occupations issued June 1971 by the U.S. Department of Commerce and the Bureau of the
Census was used for this variable. Please refer to Appendix V2, Wave XIV documentation,

Annual Food Standard
This variable is generated by multiplying the weekly food needs (V3439) by 52 and then making the following adjustments for economies of scale:

add
20 percent for one-person families
10 percent for 2-person families
5 percent for 3-person families;

subtract
5 percent for 5-person families
10 percent for families with six or more.

See note at V3439 (weekly food needs, used in computing this variable) regarding use of 1967 dollar values.

V3730   **"HOUSEHOLD ID # 74"**   **NUM(4.0)**
Household ID Number

This variable was generated to simplify the clustering of multiple panel family units residing in the same households. Its values were assigned simply by selecting a 1974 ID number (V3402) with the lowest value from among the 1974 ID numbers of those families comprising each such household group. This value was used in these file positions for all of the related households. Thus, if the user sorts the data ordered by this variable, the family units within larger household groups will be adjacent to each other. Family units who did not share their households with any other family unit or shared only with non-panel family units were given their own values for V3402.

V3732   **"CENSUS NEEDS STANDARD-1973"**   **NUM(5.0)**
Annual Needs Standard for the 1973 Family--CENSUS VERSION

This poverty threshold was taken from Census Bureau's website, http://www.census.gov/hhes/www/poverty/data/threshld/index.html We have used the table entitled 'Income Thresholds at the Poverty Level by Sex of Head, Size of Family, and Number of Related Children Under 18 Years Old, by Farm-Nonfarm Residence.' We used Non-Farm Residence tabulations.

The threshold values are based on sex of Head, family size, the number of persons in the family under age 18, and the age of the householder. Due to some of the limitations of our extant files, we were unable to generate the number of months for those individuals who moved out of multiple families in the same wave. Otherwise the calculation of needs is similar to that described in Section I, Part 5, of guide to the 1993 PSID data, 93GUIDE.PDF.
