#### V16411 "LABOR PART FARM Y 88"

NUM(5.0)

Labor and asset splits of farm and business income were made using the 1988 work hours on jobs which generated those incomes. The rules are as follows:

1) if work hours are greater than or equal to the (positive) dollar amount, then all income is assumed to be labor.

2) if work hours are less than the dollar amount, assume that labor is worth at least \$1.00 per hour and that all income above that amount is split equally between labor and asset.

Labor Portion=Total farm or business income/2 + work hours/2 Asset Portion=Total farm or business income/2 - work hours/2

1989 Head's Labor Part of Farm Income in 1988 (Question G5)

3) if total farm or business income represents a loss (i.e., a negative number), then the labor portion equals 0 and the loss is coded in the asset portion.

The values for this variable in the range 00001-99998 represent the labor portion of Head's farm income reported at G5 in whole dollars; all missing data were assigned. The asset portion of farm income is located at V16422. See the note above for labor-asset split rules.

#### V16417 "LABOR PT MKT GARDEN 88"

1989 Head's Labor Portion of Income from Farming or Market Gardening in 1988 (Question G19:b)

Labor and asset splits of farming/market gardening were made using the 1988 work hours from the job that generated that income. The rule for these splits assumes 75% of the dollar amount is labor income, and the remaining 25% is asset income. If a loss is reported, then the labor portion equals zero and the loss is coded in the asset portion.

The values for this variable in the range 00001-99998 represent the labor portion of the farming and market gardening income reported at F19:b in whole dollars; all missing data were assigned. The asset portion of this income is located at V16424.

1989 Head's Labor Portion of Income from Roomers and Boarders in 1988 (Question G19:c) Labor and asset splits of income from roomers and boarders were made using the 1988 work hours from the job which generated this income. The rules are as follows:

1) If Head owns the home, total income is split 50-50 into labor and asset.

2) If Head rents the home, all income is assumed to be labor income.

The values for this variable in the range 00001-99998 represent the labor portion of the income from roomers and boarders reported at G19:c in whole dollars; all missing data were assigned. The asset portion of this income is located at V16425.

#### V16560 "P PRORAT TXBL Y 1ST OFUM"

Percentage Prorated Taxable Income of First Other FU Member

Incomes for part-year family unit members are coded based on the portion of annual income earned and the amount of time these persons were living in the family during 1988. This percent proration variable provides a means of creating whole-year income for the individual; simply divide the total taxable income (V16561) by the percent proration (V16560).

Count	olo	Value/Range	Code Value/Range Text
280	3.94	1 - 99	Percent of prorated taxable income

#### V16561 "TXBL Y 1ST XTRA EARNER"

Taxable Income in 1988 of First Other FU Member (and Spouse)

If the 1988 Head or Wife/"Wife" moved out or died by 1989 (see V16563 below), then his or her taxable income, if any, is included here. The range of values for this variable is -99999 through 999999; 000000 represents zero income and negative values represent overall income losses. All missing data were assigned.

V17452-V17524 are asked only when the FU acquires a new Head. In cases where the Head has remained the same person from the previous interview, these variables have been carried forward from the previous year's data with no updating or other change. Values for V17452-V17468 were brought forward from 1985 or earlier years, as indicated by V17568, but V17469-V17524 were asked of all Heads in 1985. L57. How many years altogether have you (HEAD) worked for money since you were 18? V17452-V17524 are asked only when the FU acquires a new Head. In cases where the Head has remained the same person from the previous interview, these variables have been carried forward from the previous year's data with no updating or other change. Values for V17452-V17468 were brought forward from 1985 or earlier years, as indicated by V17568, but V17469-V17524 were asked of all Heads in 1985. NUM(2.0)

V17523-V17524 do not take account of changes in Head's employment history since these questions were actually asked. The user may update these variables by recoding data for subsequent years.

The values for this variable represent in whole years the actual amount of time the Head had worked since the age of 18 until the time of the interview. In 1985, this question was re-asked only of then-current Heads who had worked at all since January 1, 1984; all other 1985 Heads were updated. See Section I, Part 5, p. 72 in the Wave XX (1987) documentation for details.

### V17527 "# OF INDIVIDUAL RECORDS"

Total Number of Individual Data Records Associated with 1989 Family Unit

The values for this variable represent the number of individual-level data records on the merged family-individual tape having the same family-level data in 1989, that is, all persons in the family in 1989 and any institutionalized individuals associated with the family, as well as any movers-out between 1988 and 1989 who did not move into another responding family.

### V17528 "H+W 1988 FED TAXES"

Total Estimated Federal Income Taxes of 1989 Head and Wife/"Wife" for 1988 Tax Year The values for this variable in the range -1275 through 99998 represent the actual estimate made for taxes.

V17528 and V17529 were computed using the following variables:

V16435 Taxable Income of Head and Wife/"Wife" V16440 Total Number of Exemptions V16441 Tax Table Used

Negative values are allowed for this variable for those eligible for the earned income credit and whose taxes are less than the amount of the credit. For highly detailed information on the PSID's estimation of taxes, see the 1985 (wave XVIII) documentation volume, pp. 91-100. Additionally, check Section 1, Part 5 of this volume for updating rules since then.

#### V17530 "1ST XTRA ERNER 88 TAXES"

# Estimated Federal Income Taxes of First Extra Earner for 1988 Tax Year For 1989 data only, estimated taxes and marginal rates for second through fifth extra earners are omitted. See V17532 and the 1989 documentation, Section I, Part 5, 1989 Omissions for details.

The values for this variable in the range -999 through 9998 represent the actual estimate made for taxes. Negative values are allowed here for former Heads and Wives/"Wives" eligible for the earned income credit and whose taxes are less than the amount of the credit. Incomes for those who are not current Heads or Wives/"Wives" are coded only for the part of the year that they were in the family in 1988. This estimate of tax liability takes account of that fact. See Section I, Part 5 of this volume for further details.

V17530 and V17531 were computed using the following variables:

V16560 Percent Proration of First Extra Earner V16561 Taxable Income V16562 Total Number of Exemptions V16563 Tax Table Used

See the 1985 (wave XVIII) documentation volume, pp. 91-100, for a complete description of the tax variables. Additionally, check Section 1, Part 5 of this volume for updating rules since then.

### V17531 "MARG TAX RATE ERNR ONE"

Marginal Tax Rate of First Extra Earner for 1988 Tax Year

For 1989 data only, estimated taxes and marginal rates for second through fifth extra earners are omitted. See V17532 and the 1989 documentation, Section I, Part 5, 1989 Omissions for details.

The values for this variable represent the actual marginal tax rate based on this person's percent proration, taxable income, number of exemptions, and the tax table used.

### V17532 "TOT TAXES ALL XTRA ERNR"

### Total Estimated Federal Income Taxes of All Extra Earners for 1988 Tax Year

The values for this variable in the range -1275 through 99998 represent the actual estimate made for taxes. Negative values may occur in this variable if a former Head or Wife/"Wife", as first extra earner, has negative values at V17530. Although separate variables for estimated taxes of the second through fifth extra earners have been omitted from the data, those amounts are included here along with amounts from V17530. See Section I, Part 5, 1989 Omissions for our justification.

See the 1985 (wave XVIII) documentation volume, pp. 91-100, for a complete description of the tax variables. Additionally, check Section 1, Part 5 of this volume for updating rules since then.

### V17535 "ANNUAL NEEDS STD-1988"

Annual Needs Standard for the 1988 (Last Year's) Family

This is the Orshansky-type poverty threshold based on an annual food needs standard which is derived from weekly food costs, converted to an annual amount, and adjusted for economies of scale by USDA rules as follows:

An additional adjustment for diseconomies of small households (in rent, etc.) was made as follows:

4.89 times the food needs for single persons

3.70 times the food needs for two-person units

3.00 times the food needs for all other units

The table for weekly food costs is located in the Wave XXV (1992) documentation at the description for V21487.

Please refer to the Wave VII (1974) Documentation volume, pp. 39-41, and to the User Guide for further details on the need standard. Note that this variable is not adjusted for inflation (it makes use of the weekly food costs table, which is in 1967 dollars), nor is it exactly comparable to the official poverty standard; such changes are left to users. This need standard is adjusted for changes in family composition during 1988 and is not adjusted for farmers. See Section I, Part 5, Generation of Income/Needs Comparable with 1988 and Earlier Waves for generation instructions for an income/needs variable that does make such an adjustment.

County of Residence at Time of 1989 Interview (FIPS Code)

This variable is suppressed (filled with zeroes) in the public release file to protect the anonymity of respondents. The data are available in a separate file: FIPSCntyYEAR where Year is the corresponding Census year (i.e. FIPSCnty10 is using the 2010 Census frame). This variable is the county as per the address at the time of interview coded to the most recent version of the Census data (using FIPS county codes). This variable is suppressed (filled with zeroes) in the public release file to protect the anonymity of respondents. The data are available in a separate file: FAM19YEAR\_rst where Year is the corresponding Family File year (i.e. FAM1968\_rst contains data for suppressed variables from the 1968 file). This file is available to qualified users under special contractual arrangements with the PSID. For more information, contact us at PSIDhelp@umich.edu and request PSIDCountyIdentifiers restricted file.

These codes are based on matches to the FIPS state and county codes. However, code values have been increased by one. That is, code 01 here is equivalent to code 0 as originally used by Beale and Ross. Metropolitan status is that announced by the Office of Management and Budget in June 1983, when the current population criteria were first applied to results of the 1980 Census. Adjacency was determined by both physical boundary adjacency and a finding that at least 2 percent of the employed labor force in the nonmetropolitan county commuted to metropolitan central counties.

# V17545 "EDUCATION 1989 HEAD"

1989 Head's Completed Education Level

This variable is not strictly comparable to those of early waves of data collection; since 1975, variables comparable to V17486-V17516 have been coded as well. Additionally, this variable is not strictly comparable to similar variables in 1975-1984; the question regarding difficulty in reading or writing was omitted from 1985 onward. As with the component data items from which this variable is created, the values here reflect the educational attainment level of the Head when he or she became a new Head. In cases where the Head has remained the same person from the previous interview, this variable has been carried forward from the previous year's data with no updating or other changes. Education was re-asked of all Heads in 1985. See V17568 for the recency of this information.

### V17546 "EDUCATION 1989 WIFE"

NUM(1.0)

1989 Wife's/"Wife's" Completed Education Level

This variable is not strictly comparable to those of early waves of data collection; since 1975, variables comparable to V17421-V17447 have been coded as well. As with the component data items from which this variable is created, the values here reflect the educational attainment level of the Wife/"Wife" when she became a new Wife/"Wife". In cases where the Wife/"Wife" has remained the same person from the previous interview, this variable has been carried forward from the previous year's data with no updating or other changes. Education was re-asked of all Wife's/"Wife's" in 1985. See V17569 for the recency of this information.

### V17556 "# INDS IN ARMED FORCES"

NUM(1.0)

Number of Individuals in the Armed Forces V17556-V17559 are summaries of information about individuals in institutions, as coded on the individual-level dataset. Such an individual, in order to be included in the following

four variables, must have the same 1989 ID number as this family (V30606 must equal V16302) and his or her sequence number (V30607) must equal 51-59. The "reason for nonresponse" variable (V30640) was consulted for the type of institution.

The values for this variable represent the actual number of individuals (1-9) that were in the armed forces. Such individuals must conform to the rule above, and their values for V30640 must equal 11.

# Year in Which 1989 Head Most Recently Became New Head

This variable contains the last two digits of the year of data collection in which background information in V17452-V17468 was most recently gathered for the 1989 Head. If a Head splits off from the main family, e.g., through divorce, background information is re-asked. Some of this information can change over time; thus, this variable can be used by the analyst to indicate which waves of data might be searched to update the variables concerned. However, in the 1985 wave, most background information (1989: V17469-V17524) was re-asked.

#### NUM(4.0)

NUM(1.0)

1989 Interview Number of the First Other PSID Family Unit Sharing the Household with This Family

V17572-V17583 provide the user with a means of linking data between panel families that share the household. Each family involved in such a living arrangement has nonzero values here that represent all of the other panel families in the household. There are three sets of these variables, as that was the maximum number of other such families sharing the household for any given case. Please see PSID User Guide for a more detailed description.

Values for this variable in the range 0001-7114 represent the actual 1989 ID number of the first other family living with this one.

# V17584 "HOUSEHOLD ID #"

NUM(4.0)

Household ID Number

This variable was generated to simplify the clustering of multiple panel family units residing in the same households. Its values were assigned simply by selecting a 1989 ID number (V16302) with the lowest value from among the 1989 ID numbers (V16302) of those families comprising each such household group. This value was used in these tape locations for all of the related households. Thus, if the user sorts the data ordered by this variable, the family units within larger household groups will be adjacent to each other. Family units who did not share their households with any other family unit or shared only with non-panel family units were given their own values for V16302. The range of values is 0001-7114, but the series is not contiguous. See Linking Data: Families Sharing Households in Section I, Part 5 in the front matter of this volume for a discussion of ways to identify shared households in the early years of the PSID.

## NUM(1.0)

#### V17585 "# BORN TO HD ONLY IN 88"

# NUM(1.0)Number of Children Born During Calendar Year 1988 to Head But Not Jointly with Wife/"Wife", Husband of Head, or First-Year Cohabiter The information in V17585-V17588 is based on data gathered in birth history questions interspersed throughout Section J of the 1989 questionnaire. The birth data were asked for:

a) each male Head, unless all of the following were true: he was also Head in 1988, had the same legal Wife in both waves (V16189=1 and V17567=1 and V16310=0-1), and she was age 45 or older at the time of the 1989 interview.

b) each female Head, unless both of the following were true: she was Head, Wife, or "Wife" in 1988 and was age 45 or older at the time of the 1989 interview.

c) each Wife or "Wife", unless both of the following were true: she was Head, Wife, or "Wife" in 1988 and was age 45 or older at the time of the 1989 interview.

d) all other family unit members, including husbands of Head (V30608=90) and first-year cohabiters (V30608=88), who were age 12 through 44 at the time of the 1989 interview.

The values for this variable indicate the number of children born between January 1, 1988 and December 31, 1988 to the Head but not jointly with the Wife/"Wife", husband of Head, or first-year cohabiter (V30608=20, 22, 90 or 88 respectively), if one is present in the FU. The data are based only on information reported in the 1989 wave. Because of age and relationship variations in what was asked, this information is not known in some cases. If birth questions were asked about the Head but not the Wife/"Wife", husband of Head or first-year cohabiter, then births to Head were counted in this variable.

# V17587 "#BRN TO H+W JOINTLY IN88"

Number of Children Born During Calendar Year 1988 Jointly to Head and Wife/"Wife", Husband of Head, or First-Year Cohabiter

The values for this variable indicate the number of children born between January 1, 1988 and December 31, 1988 whose parents are Head and Wife/"Wife", husband of Head, or firstyear cohabiter (V30608=20, 22, 90 or 88 respectively). # V17592 "K118 VALUE OF VEHICLS 84"

K118. What about the value of what you own on wheels, like cars, trucks, a motor home, a trailer, or a boat--what are they worth, minus anything you still owe on them?-1984 Since imputation procedures for 1989 wealth components were more elaborate than those used in processing the 1984 wealth components, we added to the 1989 family record (V17589-V17609) the 1984 wealth components from the 1984 family associated with this 1989 family and applied similar imputation procedures. Also, we then corrected several errors in the 1984 data. See The 1989 Wealth Supplement in Section I, Part 5 of the 1989 documentation.

Values for this variable in the range -99999 through 999998 represent the net value of vehicles; 000000 represents a value of zero. All missing data were assigned. See The 1989 Wealth Supplement in Section I, Part 5 for details about imputation procedures.

# V17613 "CENSUS NEEDS STANDARD-1988"

NUM(5.0)

Annual Needs Standard for the 1988 Family--CENSUS VERSION This poverty threshold was taken from Census Bureau's website, http://www.census.gov/hhes/www/poverty/threshld/index.html. We have used the table

entitled 'Poverty thresholds by Size of Family and Number of Children'

The threshold values are based on family size, the number of persons in the family under age 18, and the age of the householder. Due to some of the limitations of our extant files, we were unable to generate the number of months for those individuals who moved out of multiple families in the same wave. Otherwise the calculation of needs is similar to that described in Section I, Part 5, of guide to the 1993 PSID data, 93GUIDE.PDF.
