We'd like to know more about how old you were when you had the health condition(s) we just talked about.

To help you remember, I want to first ask you about some things that may have happened in your childhood.

The 3 landmark health EHC questions asked only about ages of the parental separation, move, or school start/change if any of these events happened. If the response to any landmark question was a denial across all 17 possible ages, we recoded those 17 age variables to inap.

We'd like to know more about how old Reference Person was when (he/she) had the health condition(s) we just talked about.

To help you remember, I want to first ask you about some things that may have happened in (his/her) childhood.

ParentSepEHC. If parents or guardians separated during (his/her) childhood, please tell me how old (he/she) was at the time of each separation, starting with the first time they separated. Any other separations?--SP RPT REFERENCE PERSON AGE < 1

The 3 landmark health EHC questions asked only about ages of the parental separation, move, or school start/change if any of these events happened. If the response to any landmark question was a denial across all 17 possible ages, we recoded those 17 age variables to inap.

We'd like to know more about how old (Spouse/Partner) was when (he/she) had the health condition(s) we just talked about.

To help you remember, I want to first ask you about some things that may have happened in (his/her) childhood.

ParentSepEHC. If (Spouse's/Partner's) parents or guardians separated during (his/her) childhood, please tell me how old (he/she) was at the time of each separation, starting with the first time they separated. Any other separations?--SP RPT SPOUSE/PARTNER AGE < 1

The 3 landmark health EHC questions asked only about ages of the parental separation, move, or school start/change if any of these events happened. If the response to any landmark question was a denial across all 17 possible ages, we recoded those 17 age variables to inap.

SchoolEHC. At what age did (Spouse/Partner) first start going to school? If (he/she) changed schools during (his/her) childhood, please tell me how old (he/she) was each time, starting with the first time. Any other school changes?--OTR RPT SPOUSE/PARTNER AGE 16

The 3 landmark health EHC questions asked only about ages of the parental separation, move, or school start/change if any of these events happened. If the response to any landmark question was a denial across all 17 possible ages, we recoded those 17 age variables to inap.

ER76688 "K-6 NON-SPEC PSYCHOL DISTRESS SCALE" NUM(2.0)

The K-6 Non-Specific Psychological Distress Scale

This scale was developed by Dr. Ronald Kessler, Professor of Healthcare Policy at Harvard Medical School. It includes six items, H59a-H59f (ER76682- ER76687), using a scale of 1-5, which ranges from 'all of the time' to 'none of the time.'
The items are rescored as follows: A response of 'All of the Time' = 4 points, 'Most of the Time' = 3 points, 'Some of the Time' = 2 points, 'A Little of the Time' = 1 point, and 'None of the Time' = 0 points.
The scores are summed; a score of 13 or higher indicates sensitivity around the threshold for the clinically significant range of the distribution of nonspecific distress.

During the post-interview phase, we asked questions of the interviewer about the interview experience. For this series, IO28, we ask the interviewer if the Respondent had help answering any of the interview questions. We follow up asking who helped the Respondent. The sequence number of the helpers are located on the Respondent record of the PSID 1968-2019 Individual File at ER34712-ER34714. Once we have determined that the Respondent had help with the interview, we ask with which sections each of the helpers aided.

These codes are based on matches to the FIPS state and county codes against the 2013 Rural-Urban Continuum Codes published by USDA downloaded from https://www.ers.usda.gov/data-products/rural-urban-continuum-codes/.aspx

The 2013 Rural-Urban Continuum Codes form a classification scheme that distinguishes metropolitan counties by the population size of their metro area, and nonmetropolitan counties by degree of urbanization and adjacency to a metro area. The official Office of Management and Budget (OMB) metro and nonmetro categories have been subdivided into three metro and six nonmetro categories. Each county in the U.S. is assigned one of the 9 codes. This scheme allows researchers to break county data into finer residential groups, beyond metro and nonmetro, particularly for the analysis of trends in nonmetro areas that are related to population density and metro influence. The Rural-Urban Continuum Codes were originally developed in 1974. They have been updated each decennial since (1983, 1993, 2003, 2013), and slightly revised in 1988. Note that the 2013 Rural-Urban Continuum Codes are not directly comparable with the codes prior to 2000 because of the new methodology used in developing the 2000 metropolitan areas.

ER77599 "COMPLETED ED-RP" NUM(2.0)
Reference Person's Completed Education Level

Values in the range 1-16 represent the actual grade of school completed; e.g., a value of 8 indicates that the Reference Person completed the eighth grade.

Values were computed as follows: If it is not known whether Reference Person attended college (ER76919=8 or 9) or the number of years of college is unknown (ER76922=8 or 9), then the value is 99. Otherwise, if Reference Person attended college (ER76919=1), then the value is 12 plus the number of years of college attended (ER76922). Otherwise, if Reference Person did not attend college, (ER76919=5), the values are as follows:

(a) if Reference Person is a high school graduate (ER76908=1), the value is 12;

(b) if Reference Person received a GED (ER76908=2), the value is the last grade finished (ER76911);

(c) if Reference Person neither graduated from high school nor got a GED (ER76908=3), the value is the last grade finished (ER76916);

(d) if it is not known whether Reference Person graduated from high school, got a GED, or neither (ER76908=8 or 9), then the value is 99.

Education is asked only when the FU acquires a new Reference Person/Spouse/Partner. In cases where the Reference Person has retained the same designation of Reference Person/Spouse/Partner from the previous interview (ER76856=5), this variable has been carried forward from previous years' data. If Reference Person/Spouse/Partner reports updated education and it is higher than previously reported, then this variable is updated. Education was reasked of all Reference Persons in 1985 and 2009 and, as of 2015, all returning Reference Persons/Spouses/Partners are asked for an updated education report every wave. Please refer to variable Year Highest Education was Updated-Reference Person (ER76906) for recency of updated education information.

This variable differs from the individual level variable ER34752 in the treatment of Reference Persons who received a GED but did not attend college. The family-level variable value for such Reference Persons is the grade completed; for the individual-level variable, the value is 12.

(d) if it is not known whether Spouse/Partner graduated from high school, got a GED, or neither (ER76763=8 or 9), then the value is 99.

ER77604 "YEAR NEW REF PERSON IN FU" NUM(4.0)

Year in Which 2019 Reference Person Most Recently Became New Reference Person/Spouse/Partner

This variable contains the year of data collection in which background information in ER76856-ER76964 was most recently gathered for the 2019 Reference Person. If a Reference Person splits off from the main family, e.g., through divorce, background information is re-asked. Some of this information can change over time; thus, this variable can be used by the analyst to indicate which waves of data might be searched to update the variables concerned. However, in the 1985 and 1997 waves, most background information was re-asked. The 2019 variables that are equivalent to background variables asked of all Reference Persons in 1985 are ER76877-ER76888, ER76895-ER76898, ER76905, ER76908-ER76936, ER76941-ER76958 and ER70941-ER70942; the 2019 variables that are equivalent to background variables asked of all Reference Persons in 1997 are ER76857-ER76863, ER76867-ER76873, ER76897-ER76900, and ER76937. All 1997/1999 Immigrant sample Reference Persons were asked this information in 1997 (or 1999, for the 97/99 Immigrant sample addition). All 2017/2019 Immigrant sample Reference Persons were asked this information in 2017 (or 2019, for the 17/19 Immigrant sample addition). All recontacts were asked for background information in 2019.

ER77605 "YEAR NEW SPOUSE IN FU" NUM(4.0)

Year in Which 2019 Spouse/Partner Most Recently Became New Reference Person/Spouse/Partner

This variable contains the year of data collection in which background information in ER76711-ER76819 was most recently gathered for the 2019 Spouse/Partner. If a Spouse/Partner splits off from the main family, e.g., through divorce, background information is re-asked. Some of this information can change over time; thus, this variable can be used by the analyst to indicate which waves of data might be searched to update the variables concerned. In 1985, all Spouses/Partners were asked all of the background information. In 1997, most of the background information was re-asked--the 2019 equivalent variables are ER76711-ER76718, ER76722-ER76728, ER76752-ER76755, and ER76792. Immigrant sample 1997/1999 Spouses/Partners were asked this information in 1997 (or 1999, for the 97/99 Immigrant sample addition). Immigrant sample 2017/2019 Spouses/Partners were asked this information in 2017 (or 2019, for the 17/19 Immigrant sample addition). All recontacts were asked for background information in 2019.

ER77621 "HOUSEHOLD ID #" **NUM(5.0)**
Household ID Number

This variable was generated to simplify the clustering of multiple panel family units residing in the same households. Its values were assigned simply by selecting a 2019 ID number (ER72002) with the lowest value from among the 2019 ID numbers (ER72002) of those families comprising each such household group.
This value was used in these file positions for all of the related households. Thus, if the user sorts the data ordered by this variable, the family units within larger household groups will be adjacent to each other. Family units who did not share their households with any other family unit or shared only with non-panel family units were given their own values for ER72002. The range of values is 1-8738, but the series is not contiguous. See 'Linking Data: Families Sharing Households' in Section I, Part 5, of the guide to the 1993 family data, 93GUIDE.PDF, for a discussion of ways to identify shared households in the early years of the PSID.
