V23325   "1992 ANNUAL NEEDS STANDARD"   NUM(5.0)
Annual Needs Standard for the 1992 (Last Year's) Family -USDA VERSION
This is the Orshansky-type poverty threshold based on an annual food needs standard which is derived from the weekly food costs in the preceding variable, converted to an annual amount, and adjusted for economies of scale by USDA rules as follows:

Single person . . . . .add 20%
Two persons . . . . .add 10%
Three persons . . . . add 5%
Four persons . . . . .no change
Five persons . . . . .deduct 5%
Six or more persons . . . . deduct 10%

An additional adjustment for diseconomies of small households (in rent, etc.) was made as follows:

4.89 times the food needs for single persons
3.70 times the food needs for two-person units
3.00 times the food needs for all other units

The table for weekly food costs is located in the Wave XXV (1992) documentation at the description for V21487.

Please refer to the Wave VII (1974) Documentation volume, pp. 39-41, and to the User Guide for further details on the need standard. Note that this variable is not adjusted for inflation (it is in 1967 dollars), nor is it exactly comparable to the official poverty standard; such changes are left to users. This need standard is adjusted for changes in family composition during 1992 and is not adjusted for farmers.

V23326   **"CENSUS ANNUAL NEEDS STANDARD"**   NUM(5.0)
Annual Needs Standards-CENSUS VERSION

*This poverty threshold was taken from Table A on p. vii of the U.S. Census' Current
Population Reports, Series P-60, No. 185, Poverty in the United States: 1992. The
threshold values are based on family size, the number of persons in the family under age
18, and the age of the householder. This variable has been adjusted for changes in family
composition during 1992 so that it matches part-year incomes included in the total family
money income (V23322). Please refer to Section I, Part 5 of this volume for further
details about the generation process and a reproduction of Table A.*

These codes are based on matches to the FIPS state and county codes. However, code values have been increased by one. That is, code 01 here is equivalent to code 0 as originally used by Beale and Ross. Metropolitan status is that announced by the Office of Management and Budget in June 1983, when the current population criteria were first applied to results of the 1980 Census. Adjacency was determined by both physical boundary adjacency and a finding that at least V2 percent of the employed labor force in the nonmetropolitan county commuted to metropolitan central counties.

V23333   **"COMPLETED ED-HD 1993"**   NUM(2.0)
1993 Head's Completed Education Level
This variable is almost identical to the individual-level variable V30820.

Values in the range 01-16 represent the actual grade of school completed, e.g., a value of 08 indicates that the Head completed the eighth grade. A code value of 17 indicates that the Head completed at least some postgraduate work. This variable contains values from 1993 family-level data, although information about completed education is not asked annually. Values were computed as follows:

If it is not known whether Head attended college (V23290=9) or the number of years of college is unknown (V23293=9), then the value is 99.

If Head attended college (V23290=1), then the value is 12 plus the number of years of college attended (V23293).

Otherwise, if Head did not attend college, (V23290=5), the values are as follows:

  (a) if Head is a high school graduate (V23279=1), the value is 12;
  (b) if Head recevied a GED (V23279=2), the value is the last grade finished (V23282);
  (c) if Head neither graduated from high school, nor got a GED (V23279=3), the value is the last grade finished (V23287);
  (d) if it is not known whether Head graduated from high school, got a GED, or neither (V23279=8 or 9), then the value is 99.

This variable differs from the individual level variable V30820 in the treatment of Heads who received a GED but did not attend college. The family-level variable value for such heads is the grade completed; for the individual-level variable, the value is 12. Education was reasked of all Heads in 1985. See V23339 for the recency of this information.

1993 Wife's/"Wife's" Completed Education Level
This variable is almost identical to the individual-level variable V30820.

Values in the range 01-16 represent the actual grade of school completed, e.g., a value of 08 indicates that the Wife/"Wife" completed the eighth grade. A code value of 17 indicates that she completed at least some postgraduate work. This variable contains values from 1993 family-level data, although information about completed education is not asked annually. Values were computed as follows:

If it is not known whether the Wife/"Wife" attended college (V23222=9) or the number of years of college is unknown (V23224=9), then the value is 99.

If she attended college (V23222=1), then the value is 12 plus the number of years of college attended (V23224).

Otherwise, if she did not attend college, (V23222=5), the values are as follows:

  (a) if she is a high school graduate (V23215=1), the value is 12;
  (b) if she recevied a GED (V23215=2), the value is the last grade finished (V23217);
  (c) if she neither graduated from high school, nor got a GED (V23215=3), the value is the last grade finished (V23220);
  (d) if it is not known whether she graduated from high school, got a GED, or neither (V23215=8 or 9), then the value is 99.

This variable differs from the individual level variable V30820 in the treatment of Wives/"Wives" who received a GED but did not attend college. The family-level variable value for them is the grade completed; for the individual-level variable, the value is 12. Education was reasked of all Wives/"Wives" in 1985. This variable contains the year of data collection in which background information in V23246-V23261 was most recently gathered for the 1993 Head. If a Head splits off from the main family, e.g., through divorce, background information is reasked. Some of this information can change over time; thus, this variable can be used by the analyst to indicate which waves of data might be searched to update the variables concerned. However, in the 1985 wave, most background information (1993: V23262-V23317) was reasked. All Latino sample Heads were asked this information in 1990. Reinterview recontacts were not reasked this information (unless, of course, the Head had changed since the 1990 interview). All other recontacts were asked the background information for 1993.

V23356   **"HOUSEHOLD ID #"**   NUM(5.0)
Household ID Number
This variable was generated to simplify the clustering of multiple panel family units residing in the same households. Its values were assigned simply by selecting a 1993 ID number (V21602) with the lowest value from among the 1993 ID numbers (V21602) of those families comprising each such household group. This value was used in these file positions for all of the related households. Thus, if the user sorts the data ordered by this variable, the family units within larger household groups will be adjacent to each other. Family units who did not share their households with any other family unit or shared only with non-panel family units were given their own values for V21602. The range of values is 00001-11055, but the series is not contiguous. See Linking Data: Families Sharing Householdsin Section I, Part 5 in the front matter of this volume for a discussion of ways to identify shared households in the early years of the PSID.

V23357   **"# BORN ONLY TO HD IN 1992"**   NUM(1.0)
Number of Children Born During Calendar Year 1992 to Head But Not Jointly with Wife/"Wife", Husband of Head, or First-Year Cohabitor
NOTE: The information in V23357-V23360 is based on data gathered in birth history questions interspersed throughout Section J of the 1993 questionnaire. The birth data were asked for:

a) each male Head, unless all of the following were true: he was also Head in 1992, had the same legal Wife in both waves (V21524=1 and V23338=1 and V21608=0-1), and she was age 45 or older at the time of the 1993 interview.

b) each female Head, unless both of the following were true: she was Head, Wife, or "Wife" in 1992 and was age 45 or older at the time of the 1993 interview.

c) each Wife or "Wife", unless both of the following were true: she was Head, Wife, or "Wife" in 1992 and was age 45 or older at the time of the 1993 interview.

d) all other family unit members, including husbands of Head (V30808=90) and first-year cohabitors (V30808=88), who were age 12 through 44 at the time of the 1993 interview. All Heads and Wives/"Wives" were asked about births.

e) all splitoff recontact, sample recontact and Latino recontact Heads and Wives/"Wives".

The values for this variable indicate the number of children born between January 1, 1992 and December 31, 1992 to the Head but notjointly with the Wife/"Wife", husband of Head, or first-year cohabitor (V30808=20, V22, 90 or 88 respectively), if one is present in the FU. The data are based only on information reported in the 1993 wave. Because of age and relationship variations in what was asked, this information is not known in some cases. See the note immediately above for a description of the restrictions. If birth questions were asked about the Head but not the Wife/"Wife", husband of Head or first-year cohabitor, then births to Head were counted in this variable.

V23361   "1993 LONGITUDINAL CORE FAMILY WEIGHT"   NUM(7.3)
1993 Core Family Longitudinal Weight

This family weight was recalculated for Release 4. It is to be used only for analysis of the core sample. If you wish to analyze both the core and Latino samples, then see V23363. If you wish to analyze only the Latino sample, then see V23362.

For details on the construction of this weight, go to the PSID website, psidonline.isr.umich.edu/: select 'Data & Documentation', then select 'Sample Weights', then PSID Longitudinal Weights, and 'PSID Revised Longitudinal Weights 1993-2005'.

V23363   "1993 LONGITUDINAL COMBINED FAMILY WEIGHT"   NUM(7.3)
1993 Core-Latino Combined Family Longitudinal Weight

This weight variable is to be used only for combined analysis of the core and Latino samples. If you wish to analyze only the core sample, then see V23361. If you wish to analyze only the Latino sample, then see V23362.

Note that a few core sample families have values of zero for this variable. Families with zero value weights may include sample persons who were reinterviewed in the 1993 recontact effort or reappeared in the family after a number of years of nonresponse. Families are assigned a nonzero value for this weight variable only if they include one or more sample persons who were interviewed in 1988 or 1989. This latter criterion was necessary beginning in 1993 because the 1993 core includes a significant number of recontact families and individuals with extended sequences of missing years of PSID data. In addition, a few core families are comprised only of nonsample individuals. These were part of the elderly recontact effort.

See Section I, Part 5, of this volume and the 1989 documentation for further information. This 1993 weight has been updated for marriages, divorces, etc. since 1992. The 1993 Core Family weight also includes corrections for nonresponse that occurred since 1989 when the last complete nonresponse adjustment was performed.
