We'd like to know more about how old you were when you had the health condition(s) we just talked about.

To help you remember, I want to first ask you about some things that may have happened in your childhood.

ParentSepEHC. If your parents or guardians separated during your childhood, please tell me how old you were at the time of each separation, starting with the first time they separated. Any other separations?--SLF RPT HEAD AGE < 1

*The 3 landmark health EHC questions asked only about ages of the parental separation, move, or school start/change if any of these events happened. If the response to any landmark question was a denial across all 17 possible ages, we recoded those 17 age variables to inap.*

We'd like to know more about how old HEAD was when (he/she) had the health condition(s) we just talked about.

To help you remember, I want to first ask you about some things that may have happened in (his/her) childhood.

ParentSepEHC. If parents or guardians separated during (his/her) childhood, please tell me how old (he/she) was at the time of each separation, starting with the first time they separated. Any other separations?--OTR RPT HEAD AGE < 1

*The 3 landmark health EHC questions asked only about ages of the parental separation, move, or school start/change if any of these events happened. If the response to any landmark question was a denial across all 17 possible ages, we recoded those 17 age variables to inap.*

We'd like to know more about how old WIFE/"WIFE" was when she had the health condition(s) we just talked about.

To help you remember, I want to first ask you about some things that may have happened in her childhood.

ParentSepEHC. If WIFE's/"WIFE's" parents or guardians separated during her childhood, please tell me how old she was at the time of each separation, starting with the first time they separated. Any other separations?--SP RPT WIFE/"WIFE" AGE < 1

*The 3 landmark health EHC questions asked only about ages of the parental separation, move, or school start/change if any of these events happened. If the response to any landmark question was a denial across all 17 possible ages, we recoded those 17 age variables to inap.*

The K-6 Non-Specific Psychological Distress Scale

*This scale was developed by Dr. Ronald Kessler, Professor of Healthcare Policy at Harvard Medical School. It includes six items, H59a-H59f (ER57476- ER57481), using a scale of 1-5, which ranges from 'all of the time' to 'none of the time.' The items are rescored as follows: A response of 'All of the Time' = 4 points, 'Most of the Time' = 3 points, 'Some of the Time' = 2 points, 'A Little of the Time' = 1 point, and 'None of the Time' = 0 points. The scores are summed; a score of 13 or higher indicates sensitivity around the threshold for the clinically significant range of the distribution of nonspecific distress.*

 IO28c. What section of the interview did they answer? -- SECTION A--HELPER 1

*During the post-interview phase, we asked questions of the interviewer about the interview experience. For this series, IO28, we ask the interviewer if the Respondent had help answering any of the interview questions. We follow up asking who helped him/her. The sequence number of the helpers are located on the Respondent record of the PSID 1968-2013 Individual File at ER34212-ER34214. Once we have determined that the Respondent had help with the interview, we ask with which sections each of the helpers aided.*

ER58223 "COMPLETED ED-HD"

NUM(2.0)

Head's Completed Education Level

Values in the range 1-16 represent the actual grade of school completed; e.g., a value of 8 indicates that the Head completed the eighth grade.

Values were computed as follows: If it is not known whether Head attended college (ER57680=8 or 9) or the number of years of college is unknown (ER57683=8 or 9), then the value is 99. Otherwise, if Head attended college (ER57680=1), then the value is 12 plus the number of years of college attended (ER57683). Otherwise, if Head did not attend college, (ER57680=5), the values are as follows:

- (a) if Head is a high school graduate (ER57669=1), the value is 12;
- (b) if Head received a GED (ER57669=2), the value is the last grade finished (ER57672);
- (c) if Head neither graduated from high school nor got a GED (ER57669=3), the value is the last grade finished (ER57677);
- (d) if it is not known whether Head graduated from high school, got a GED, or neither (ER57669=8 or 9), then the value is 99.

Education is asked only when the FU acquires a new Head/Wife/"Wife". In cases where the Head has retained the same designation of Head/Wife/"Wife" from the previous interview (ER57618=5), this variable has been carried forward from previous years' data. If Head/Wife/"Wife" reports updated education and it is higher than previously reported, then this variable is updated. Education was reasked of all Heads in 1985 and 2009 and, as of 2013, all returning Heads/Wives/"Wives" are asked for an updated education report every wave. Please refer to variable Year Highest Education was Updated-Head (ER57667) for recency of updated education information.

This variable differs from the individual level variable ER34230 in the treatment of Heads who received a GED but did not attend college. The family-level variable value for such Heads is the grade completed; for the individual-level variable, the value is 12.

Otherwise, if Wife/"Wife" attended college (ER57570=1), then the value is 12 plus the number of years of college attended (ER57573). Year in Which 2013 Head Most Recently Became New Head/Wife/"Wife

*This variable contains the year of data collection in which background information in ER57618-ER57714 was most recently gathered for the 2013 Head. If a Head splits off from the main family, e.g., through divorce, background information is reasked. Some of this information can change over time; thus, this variable can be used by the analyst to indicate which waves of data might be searched to update the variables concerned. However, in the 1985 and 1997 waves, most background information was reasked. The 2013 variables that are equivalent to background variables asked of all Heads in 1985 are ER57639-ER57650, ER57657-ER57660, ER57666, ER57669-ER57687, ER57690-ER57707 and ER57709-ER57710; the 2013 variables that are equivalent to background variables asked of all Heads in 1997 are ER57619-ER57625, ER57629-ER57635, ER57659-ER57662, and ER57688. All immigrant sample Heads were asked this information in 1997 (or 1999, for the immigrant sample addition). All recontacts were asked for background information in 2013.*

**ER58229 "YEAR NEW WIFE IN FU"**

**NUM(4.0)**

Year in Which 2013 Wife/"Wife" Most Recently Became New Head/Wife/"Wife"

*This variable contains the year of data collection in which background information in ER57508-ER57604 was most recently gathered for the 2013 Wife/"Wife". If a Wife/"Wife" splits off from the main family, e.g., through divorce, background information is reasked. Some of this information can change over time; thus, this variable can be used by the analyst to indicate which waves of data might be searched to update the variables concerned. In 1985, all Wives/"Wives" were asked all of the background information. In 1997, most of the background information was reasked--the 2013 equivalent variables are ER57508-ER57515, ER57519-ER57525, ER57549-ER57552, and ER57578. Immigrant sample Wives/"Wives" were asked this information in 1997 (or 1999, for the immigrant sample addition). All recontacts were asked for background information in 2013.*

**ER58245      "HOUSEHOLD ID #"** **NUM(5.0)**  
Household ID Number

*This variable was generated to simplify the clustering of multiple panel family units residing in the same households. Its values were assigned simply by selecting a 2013 ID number (ER53002) with the lowest value from among the 2013 ID numbers (ER53002) of those families comprising each such household group. This value was used in these file positions for all of the related households. Thus, if the user sorts the data ordered by this variable, the family units within larger household groups will be adjacent to each other. Family units who did not share their households with any other family unit or shared only with non-panel family units were given their own values for ER53002. The range of values is 1-8738, but the series is not contiguous. See 'Linking Data: Families Sharing Households' in Section I, Part 5, of the guide to the 1993 family data, 93GUIDE.PDF, for a discussion of ways to identify shared households in the early years of the PSID.*
